

**North Canyon Dentistry
17215 N. 72nd Dr., Suite A-100
Glendale, AZ 85308
(623)582-8384**

Amalgam or Composite Fillings

Following your procedure it is normal to be sensitive to hot, cold and chewing for several days to several weeks, but should get better each day. You may need aspirin or Tylenol to alleviate the initial soreness from the procedure.

When the anesthetic wears off and if your bite feels high, please call the office so we can adjust the filling.
